RESHMI

Frontend Developer

Kolkata, India • +91 6207 026 720 • reshmi0905kumari@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Fresher Frontend Developer with hands-on project experience building responsive, accessible web interfaces using React.js, Next.js, JavaScript (ES6+), HTML5 and CSS3. Comfortable turning Figma designs into clean, reusable components and taking projects from idea to deployment. Third-year B.Tech student at Netaji Subhash Engineering College, Kolkata (graduating 2028), eager to grow as a frontend engineer on a product team.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: React.js, Next.js, Tailwind CSS

Tools & Practices: Git & GitHub, VS Code, Figma, npm, Vercel, Chrome DevTools, Responsive UI Design

Currently Learning: Testing with Vitest, Web Performance, Accessibility (WCAG)

PROJECTS

Personal Portfolio | Next.js + React.js + CSS · Live · Code *2026*

- Built and deployed an interactive portfolio with Next.js (App Router) and React.js on Vercel, giving recruiters a single link to projects, skills and resume.
- Designed a scroll-driven project showcase that pins in place and flips to the next project as visitors scroll, so every project gets full-screen attention.
- Created draggable Figma-style frames, cursor-following eyes and a canvas dot grid that reacts to the mouse, making the site memorable and hands-on.
- Made it fully responsive from 320px phones to large desktops, loaded heavy animations only after the page appears, and respected users' reduced-motion settings.

Solar System | HTML5 + CSS3 (no JavaScript) · Code *2026*

- Built an animated model of the solar system using only HTML and CSS, with zero JavaScript, in under 200 lines of code.
- Animated all 8 planets around the Sun with CSS @keyframes, giving each orbit its own speed (10s for Mercury up to 54s for Neptune) so inner planets visibly move faster, like the real thing.
- Created the glowing Sun, space backdrop and planets with radial gradients and box-shadow glows instead of images, keeping the page to just two lightweight files.

To-do List | JavaScript (ES6+) + HTML5 + CSS3 · Code *2026*

- Worked on a vanilla JavaScript to-do app (from an open-source collection by Petro Komar) with full CRUD: add, edit inline, mark complete and clear all tasks.
- Saves tasks to localStorage as JSON, so the list survives page refreshes and browser restarts with no backend.
- Supports Enter-to-add/save, ignores blank tasks and shows a live task counter, with completed tasks struck through.

EDUCATION

B.Tech (currently in 3rd year) | Netaji Subhash Engineering College, Kolkata, West Bengal *Expected 2028*

Schooling | Oxbridge School, Mander, Ranchi *2023*
